## OBJECTIVE

Experienced Laravel Developer skilled in PHP, Laravel, and JavaScript, specializing in custom solutions and API development. Seeking to leverage expertise in web applications and software development for impactful contributions.

## TECHNICAL SKILLS

- **Languages:** PHP, Python, JavaScript, HTML, CSS
- **Framework:** Laravel
- **Libraries:** Spatie roles and permissions, Passport, Socialite, Google SDK
- **Tools:** Git, Github, Jira, VS Code
- **Cloud Platform:** GCP, AWS, Digital Ocean, Cloud functions
- **Database:** MySQL, PostgreSQL, MongoDB(partially)

## OTHER SKILLS

- Communication
- Quick Learner
- Critical Thinking in Problem Solving
- Bug Finding Mastery

## WORK EXPERIENCE

### Laravel Developer

Coder Scotch

June 2024 - Nov 2024

Remote

- Developed and optimized applications using PHP, Laravel, MySQL, and Python for scalable solutions.
- Integrated Zoho Sign, Secured Signing, MSG91, and Telnyx to enhance workflow efficiency.
- Designed and implemented Stripe payment systems for seamless financial transactions.
- Built secure authentication systems using Google and Apple login for cross-platform access.
- Created Python scripts for automated PDF processing in secured signing workflows.
- Enhanced front-end and back-end performance, ensuring robust and reliable applications.
- Implemented role-based access controls (RBAC) using Spatie for secure and efficient user management.

### Laravel Developer

The Web Patriot

Jul 2023 - May 2024

Ahmedabad, India

- Proficient in PHP, Laravel, JavaScript, Node.js, MySQL, PostgreSQL, Ruby, and Vue.
- Customizing Chatwoot using Ruby and Vue, showcasing adaptability across different tech stacks.
- Developed Laravel APIs for seamless integration and data communication.
- Implemented Image/Video conversations in Node.js with TypeScript, demonstrating versatility in diverse technologies.
- Skilled in web applications and software development, consistently delivering high-quality solutions tailored to client needs.
- Implement best practices in software development, including code reviews, and version control.

## Laravel Trainee

Wappnet Systems

Nov 2022 - May 2023

Ahmedabad, India

- Proficient in PHP, Laravel, MySQL, PostgreSQL, and CI/CD.
- Hands-on experience in implementing spatie roles and permissions, including role-based access control (RBAC) through middleware and Blade directives.
- Proficient in executing complex Laravel relationships, ensuring robust functionality.
- Familiarity with web applications and software development practices, contributing to comprehensive project understanding and efficient delivery.

## Laravel Developer

Freelancing

Apr 2019 - Nov 2022

Remote

- Proficient in PHP, Laravel, JavaScript, TypeScript, Node.js, Python, MySQL, Docker, CI/CD, GCP, and AWS.
- Skilled in effective client communication and conducting thorough requirement analysis.
- Experienced in implementing multilingual projects, integrating payment gateways, developing referral systems, and managing wallets.

## EDUCATION

### Master of Computer Application

Parul University - Vadodara

**CGPA: 7.54**

2021-2023

### Bachelor of Computer Application

Saurashtra University - Rajkot

**CGPA: 8.22**

2018-2021

## AWARDS

Certificate of Excellence - The Web Patriot

Oct - 2023

## PROJECTS

### Hiring and Training Management - PHP, Laravel, MySQL, Python

**Coder Scotch**

- Proficient in PHP, Laravel, MySQL, and Python, with expertise in performance optimization, feature development, and integrations with Zoho Sign, Secured Signing, Telnix, and MSG91.
- Developed Python scripts for PDF processing and implemented secured signing workflows.

### Lead & Task CRM - PHP, Laravel, MySQL

**Coder Scotch**

- Developed and integrated user interfaces with Stripe for seamless payment processing.
- Implemented secure authentication systems with Google and Apple login options, ensuring cross-platform accessibility and user convenience.
- Optimized the application's front-end and back-end for enhanced performance and scalability.

### Laravel backend API - PHP, Laravel, PostgreSQL

**The Web Patriot**

- I played an integral role in integrating the backend API with the client's Chatwoot project, ensuring seamless data flow and functionality alignment.
- Expertise in Ruby and Laravel bridged technology gaps, fostering cohesive operation and data flow.

### Chatwoot - Ruby, Vue, PostgreSQL

**The Web Patriot**

- Integrated Chatwoot with Laravel backend API for enhanced communication and functionality.
- Expertise in Ruby and Laravel facilitated seamless operation and data flow across the project ecosystem.

**Drive file management** - PHP, Laravel, MySQL**The Web Patriot**

- Developed layer atop Google Shared Drive, and implemented user and permission management using PHP Laravel.
- Introduce a locking mechanism for exclusive file access within the platform.
- Ensured efficient file management while maintaining control over access permissions.

**Image & Audit management** - PHP, Laravel, Vue, MySQL**The Web Patriot**

- Fully leveraged Laravel's capabilities in crafting the Image & Audit management system.
- Utilized Laravel's security features, authentication, and authorization systems.
- Optimized backend efficiency through Laravel's queueing system for asynchronous task handling.

**Quotation Management system** - PHP, Laravel, PostgreSQL**Wappnet Systems**

- PHP, Laravel, and PostgreSQL for robust and secure development.
- Security with Laravel's authentication and authorization mechanisms.
- Boosted performance with features like quotation generation and queue management for decreased response time.

**CRM for Solar Business** - PHP, Laravel, PostgreSQL**Wappnet Systems**

- Custom CRM solution tailored for the solar business sector.
- Implement a custom Role-based access control system with blade for seamless permission management.
- Leveraged PHP, Laravel, and PostgreSQL for robust functionality, data handling, and security.

**Lead Management System** - PHP, Laravel, PostgreSQL, Stored Procedures**Freelancing**

- a subscription-based platform facilitating lead collection and upload for owners.
- Python scripts for raw lead validation in CSV or JSON format before importing into a PostgreSQL database.
- stored procedures to optimize lead imports for faster processing.

**e-Tiffin** - PHP, Laravel, MySQL**Freelancing**

- a user-friendly web and Progressive Web Application (PWA), powered by Laravel and MySQL.
- Facilitates streamlined online meal ordering, offering a seamless experience for users to browse menus, place orders, and manage their meals.

**Hisab** - PHP, Laravel, MySQL**Freelancing**

- Streamlines tracking and report generation, ideal for brokerage firms.
- Ensures efficient monitoring of transactions and financial activities, enhancing productivity and facilitating better management.

**Veg Store** - PHP, MySQL**Freelancing**

- Developed, a specialized e-commerce platform for fresh vegetable sales at a city level.
- Offers flexible pricing options based on quantity or location, ensuring tailored shopping experiences.
- Includes a referral program where customers can refer friends and family, earning referral bonuses.

**India Shop** - PHP, MySQL**Freelancing**

- an e-commerce platform tailored to the Indian market for online product sales.
- Features a referral system where users can earn money in their India Shop Wallet by referring friends and family.

**Lessonflix - PHP, MySQL****Freelancing**

- Developed, an online platform tailored for schools and institutes to efficiently manage lesson links
- Complete with tracking their completion status, providing a robust solution for organizing and monitoring lesson progress.

**The Lockhart Restaurant - ASP.NET, MsSQL****Personal Project**

- Developed, a streamlined solution for managing all aspects of restaurant operations online.
- Provides features for reservations, inventory control, and other operational tasks.

**India Health - PHP, MySQL****Personal Project**

- A comprehensive web-based portal facilitating interactions between laboratories, doctors, and patients.
- Provides a seamless platform for accessing laboratory services, consulting with doctors, and managing healthcare needs.
- Enhances accessibility and efficiency in the Indian healthcare system by offering a single unified platform for healthcare interactions.

**Techtok7 - PHP, OOPS, MySQL, Python****Personal Project**

- An online platform for pattern programming challenges.
- Utilizes PHP, OOPS, MySQL, and Python for a web-based coding environment.
- Includes scoring system, the leaderboard for user progress tracking, and competition.
- Implements Python's Cyclomatic Complexity calculation to reward code efficiency.
